DETAILED ACTION

Claim Objections

1. Claims 1-7 are objected to because of the following informalities: There are grammatical and spelling errors.

Claim 1

There is no such word as "thieved" In lines 9-10, the phrase "part of the theft modes" is vague. The word "part" suggests a continuous surface where a portion is cut out. It does not suggest a subset of discrete events. "Part" might be replaced by "some" or "a subset".

Claim 6

This claim also refers to "part of the theft modes".

Appropriate correction is required.

Specification

2. The disclosure is objected to because of the following informalities: The same improper terminology used in the claims is present throughout the disclosure, especially in the section entitled "DISCLOSURE OF THE INVENTION".

Appropriate correction is required.

Art Unit: 2836

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) **TITLE OF THE INVENTION.**
- (b) **CROSS-REFERENCE TO RELATED APPLICATIONS.**
- (c) **STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.**
- (d) **THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.**
- (e) **INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.**
- (f) **BACKGROUND OF THE INVENTION.**
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) **BRIEF SUMMARY OF THE INVENTION.**
- (h) **BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).**
- (i) **DETAILED DESCRIPTION OF THE INVENTION.**
- (j) **CLAIM OR CLAIMS** (commencing on a separate sheet).
- (k) **ABSTRACT OF THE DISCLOSURE** (commencing on a separate sheet).
- (l) **SEQUENCE LISTING** (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Lemense (5,958,081).

In order to expedite and avoid piecemeal prosecution, the following rejection is made to the extent that the claims are understood, by considering those elements which are understood and interpreting their function in a manner which is consistent with the recited goals of the claims, and then applying the best available art.

In figure 1 (C2, L20) to (C3, L17), Lemense discloses a vehicle antitheft device 12 mounted to vehicle 10. In (C2, L20-32) Lemense discloses the remote control system that enables or disables a function upon receipt of a valid security code from transmitter 16. The coded signal from transmitter 16 has a start bit and a data code portion.

Relevant Prior Art

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Schneider (5,264,825) discloses an electronic vehicle security system which includes a valet switch which disables most or all of the security functions.

Hofbeck (6,822,559) discloses a security system for a motor vehicle, which includes at least one sensor for sensing a status variable of the vehicle and enabling or disabling activation of a security device as a function of the status variable.

Okada (7,098,791) disclose a security system for notifying a driver that a mechanical key is being retained in a portable device, and when the mechanical key is

Art Unit: 2836

not retained in the key retainer, the security system disables only the smart entry function.

7. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Albert W. Paladini whose telephone number is 571-272-3748. The examiner can normally be reached from 7:00 AM to 3 PM on Monday, Tuesday, Thursday or Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Jared Fureman can be reached on 571-272-2391. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
